

Parents and students: **(Updated 8/25/2020)**

**We had change!** As we approach the Ramp Up days and the start of in-person instruction, I want to cover the mask guidelines for College Park High School. Please know that information is coming out on a daily basis about masks, the different kinds, and their effectiveness. The districts health team reviews all of the information and then passes on its recommendation. Also, be aware, that the rule of COVID are changing on a daily basis and I am sure that there will be more changes through this process as we all learn from our experiences. Please know that we all appreciate your understanding and patience.

**Types of masks that are acceptable:**

- Non-medical grade disposable face masks
- Cloth masks covering the mouth and nose
- Gaiter's (not as effective and recommended for activity only but classroom is allowable)
- Face Shield (Does not protect the individual) contact assistant principal if needed to help evaluate.

**Types of masks that are not acceptable**

- Masks that contain air vents
- Bandana's

Please know that all the decisions related to masks are for the best interest of the person wearing the mask and the others around them. It is all of our responsibility to assure the safety of each other.

Thank you for your help and cooperation.

Mark A. Murrell

Principal

College Park High School
